Apple CarPlay

You Might Just Like It

Apple CarPlay

- Available on many newer cars.
- Safer way to use your iPhone while driving.
- “Screen casts” to your cars built-in display.

Apple CarPlay

- It's a stripped-down version of iOS designed for your car.
- It relies on voice commands so you can keep your eyes on the road (not on your tiny phone screen).

Apple CarPlay

- Control with Siri, touch or twist.

Apple CarPlay

- Use it as your **GPS Navigation** device.
- Set your destination on your iPhone.
- Uses Apple Maps - so it's updated.
- Cannot use Google Maps or Waze.

ANY DOWNSIDE?

- Watch your phone's data usage. I have a 2GB plan, and have gone over the past two months.
- Apple Maps is not my favorite. And CarPlay doesn't support Google Maps or Waze.
